

Need an IT vendor for in-office tech support?

The MCMS HIT Service Bureau recommends that each practice develop a relationship with an IT vendor who can provide tech support and assistance beyond the general support provided by their individual EMR vendor.

We polled our practices to see which vendors are currently being used, or which vendors our practices wanted more information on. We sent a basic Request for Proposal (RFP) to these IT vendors and have compiled general company detail as well as specific task-related information with the intent of being able to provide our practices with a comparison of services each vendor offers and a list of references of their clients in the area.

The following list encompasses the RFPs that have been returned to us to date. We do expect to grow this list and we will post an updated list on our website monthly. If you are interested in being provided with a copy of the RFP for any of the IT vendors listed below, please contact your representative with the Service Bureau today.

Advanced Technical Solutions
Capstone Information Technologies, Inc.
Consilium1
Integrated Systems
Integrity Networking Systems
Innovative Solutions
Layer 8
Our Computer Guy
Tri-Delta Resources

We can also provide you with your own RFP template to provide to the vendors you plan on contacting. It is important for you to get your own cost analysis, since the information we have compiled is general and not specific to any one practice or the customized services you may require. We recommend that you compare pricing from up to three vendors before making a final vendor choice.

Note: Publication of this list does not equate to endorsement of these vendors by the Monroe County Medical Society. We are vendor neutral.
